

Bibliografia Renal N

1. **Bigliati M, et al.** Lactobacillus acidophilus as a probiotic in healthy adult cats. *Poster presented at SISVETI Congress 2018. Turin*
2. **Brown SA.** Oxidative stress and chronic kidney disease. *Vet Clin Small Anim* 2008;38:157-166
3. **Chung S, et al.** Oleanolic acid attenuates renal fibrosis in mice with unilateral obstruction via facilitating nuclear translocation of Nrf2. *Nutrition and Metabolism* 2014;11:2
4. **Cigarran Guldri S, et al.** Gut microbiota and chronic kidney disease. *Nefrologia* 2017;37(1):9-19
5. **EFSA.** Safety and efficacy of Lactobacillus acidophilus D2/CSL (Lactobacillus acidophilus CECT 4529) as a feed additive for cats and dogs. *EFSA Journal* 2018;16(5):5278
6. **Friedman EA.** Can the bowel substitute for the kidney in advanced renal failure? *Current Medical Research and Opinions* 2009;25(8):1913-1918
7. **Gagnè JW, et al.** Effects of a synbiotic on fecal quality, short chain fatty acids concentrations and the microbiome of healthy sled dogs. *BMC Veterinary Research* 2013;9:246
8. **Hand MS, et al.** Small Animal Clinical Nutrition. 5th edition 2010. Mark Morris Institute ed.
9. **Hong YA, et al.** Delayed treatment with oleanolic acid attenuates tubulointerstitial fibrosis in chronic cyclosporine nephropathy through Nrf2/HO-1 signaling. *Journal of Translational Medicine* 2014;12:50
10. **Keegan RF, et al.** Oxidative stress and neutrophil function in cats with chronic renal failure. *J Vet Intern Med* 2010;24:514-519
11. **Kieffer DA, et al.** Impact of dietary fibers on nutrient management and detoxification organs: gut, liver and kidneys. *Adv Nutr* 2016;7:1111-1121
12. **Koppe L, et al.** The role of gut microbiota and diet on uremic retention solutes production in the context of chronic kidney disease. *Toxins* 2018;10:155
13. **Lopes RCSO, et al.** Modulation of intestinal microbiota, control of nitrogen products and inflammation by pre/probiotics in chronic kidney disease: a systematic review. *Nutr Hosp* 2018;35:722-730
14. **Madlala HP, et al.** Changes in renal function and oxidative status associated with the hypotensive effects of oleanolic acid and related synthetic derivatives in experimental animals. *PLoS ONE* 10(6): e0128192. Doi10.1371/journal.pone.0128192
15. **Mapanga RF, et al.** Renal effects of plant-derived oleanolic acid in streptozocin-induced diabetic rats. *Renal Failure* 2009;31:481-491
16. **Meijers B, et al.** Intestinal barrier function in chronic kidney disease. *Toxins* 2018;10:298; doi:10.3390/toxins10070298
17. **Nallu A, et al.** Gut microbiome in CKD: challenges and opportunity. *TranslRes* 2017;179:24-37
18. **Pisano A, et al.** Biotic supplements for renal patients: a systematic review and meta-analysis. *Nutrients* 2018;10:1224; doi:10.3390/nu10091224
19. **Pluznik JL.** Gut microbiota in renal physiology: focus on short-chain fatty acids and their receptors. *Kidney Int* 2016;90(6):1191-1198
20. **Poesen R, et al.** The influence of dietary protein intake on mammalian tryptophan and phenolic metabolites. *PLOS ONE* | DOI:10.1371/journal.pone.0140820 October 15, 2015
21. **Pollier J.** Oleanolic acid. *Phytochemistry* 2012;77:10-15
22. **Ramezani A, et al.** Role of the gut microbiome in uremia: a potential therapeutic target. *Am J Kidney Dis* 2016;67(3):483-498
23. **Rescigno M.** Intestinal microbiota and its effect on the immune system. *Cellular Microbiology* 2014;16(7):1004-1013

24. **Rodriguez-Rodriguez R.** Oleanolic acid and related triterpenoids from olives on vascular function: molecular mechanisms and therapeutic perspectives. *Current Medicinal Chemistry* 2015;22:1414-1425
25. **Rossi M, et al.** Pre-, pro-, and synbiotics: do they have a role in reducing uremic toxins? A systematic review and meta-analysis. *Int J Nephrol* 2012; doi:10.1155/2012/673631
26. **Rossi M, et al.** Synbiotics easing renal failure by improving gut microbiology (SYNERGY): a randomized trial. *Clin J Am Soc Nephrol* 2016;11:223-231
27. **Sanchez-Quesada C, et al.** Bioactive properties of the main triterpenes found in olives, virgin olive oil and leaves of *Olea europaea*. *J Agric Food Chem* 2013;61:12173-12182
28. **Schepers E, et al.** The gut: the forgotten organ in uremia? *Blood Purif* 2010;29:130-136
29. **Swanson KS, et al.** Fructooligosaccharides and *Lactobacillus acidophilus* modify gut microbial populations, total tract nutrient digestibility and fecal protein catabolite concentrations in healthy adult dogs. *J Nutr* 2002;132:3721-3731
30. **Tsilingiri K, et al.** Postbiotics: what else? *Beneficial Microbes* 2013;4(1):101-107
31. **Tylicky L, et al.** Antioxidants: a possible role in kidney protection. *Kidney Blood Press Res* 2003;26:303-314
32. **Tzortzis G, et al.** Modulation of antipathogenic activity in canine-derived *Lactobacillus* species by carbohydrate growth substrate. *J Appl Microbiol* 2004;96:552-559
33. **Valero-Munoz M, et al.** Protective effect of a pomace olive oil concentrated in triterpenic acids in alterations related to hypertension in rats: mechanisms involved. *Mol Nutr Food Res* 2014;58:376-383
34. **Wynn SG.** Probiotics in veterinary practice. *JAVMA* 2009;234(5):606-613
35. **Zagato E, et al.** *L. paracasei* CBA L74 metabolic products and fermented milk for infant formula have anti-inflammatory activity on dendritic cells in vitro and protective effects against colitis and an enteric pathogen in vivo. *PlosOne* 2014;9(2); doi:10.1371/journal.pone.0087615
